Bookmark File PDF

Categorization in cognitive and social psychology. In a highly readable and accessible style, the author covers all the main approaches to categorization in social psychology that a student might come across, including: biased stimulus processing, construct activation, self-

Bookmark File PDF

Categorization, explanation-based, social judgeability and assimilation//contrast approaches. It is a wide-ranging and up-to-date treatment of concepts from cognitive as well as social psychology.

This book introduces a new neural network model called CALM,

Bookmark File PDF

for categorization and learning in neural networks. The author demonstrates how this model can learn the word superiority effect for letter recognition, and discusses a series of studies that simulate experiments in implicit and explicit memory, involving normal and amnesic patients.

Bookmark File PDF

Pathological, but psychologically accurate, behavior is produced by "lesioning" the arousal system of these models. A concise introduction to genetic algorithms, a new computing method based on the biological metaphor of evolution, and a demonstration on how

Bookmark File PDF

these algorithms can design network architectures with superior performance are included in this volume. The role of modularity in parallel hardware and software implementations is considered, including transputer networks and a dedicated 400-processor

Bookmark File PDF

neurocomputer built by the developers of CALM in cooperation with Delft Technical University.

Concluding with an evaluation of the psychological and biological plausibility of CALM models, the book offers a general discussion of catastrophic interference,

Bookmark File PDF

generalization, and representational capacity of modular neural networks.

Researchers in cognitive science, neuroscience, computer simulation sciences, parallel computer architectures, and pattern recognition will be interested in this volume, as well

Bookmark File

PDF

as anyone engaged in the study of neural networks, neurocomputers, and neurosimulators.
