remains by far the weakest part of the L&D cycle. Most organizations wish to evaluate the impact of their investment in training, but few do it well and the lack of effective methods is one of the key barriers. Complete Training Evaluation addresses these issues by providing practitioner-friendly information and guidance on how to evaluate all forms of learning and development. It draws on the author's own multidisciplinary research along with his practical experience of working with private and public sector organizations carrying out evaluation. The book provides practitioners with accessible "how-to" knowledge and tools to undertake evaluations of both formal and informal learning. Full of case studies and practical examples of application of methods and insights, Complete Training Evaluation equips practitioners with a range of approaches that can be used depending on the training program, capacity and capability.

While substantial advances have been made in the L&D profession over the last decade, evaluation remains by far the weakest part of the L&D cycle. Most organisations wish to evaluate the impact of their investment in training but few do it well, and the lack of effective methods is one of the key barriers. Complete Training Evaluation addresses these issues by providing practitioner friendly but academically robust information and guidance on how to evaluate all forms of learning and development. It draws on the author's own multidisciplinary research along with his practical experience of working with private and public sector organisations carrying out evaluation. The book provides practitioners with accessible 'how-to' knowledge and tools to undertake evaluations of both formal and informal learning. Full of case studies and practical examples of application of methods and insights, Complete Training Evaluation equips practitioners with a range of approaches that can be used depending on the training programme, capacity and capability.

An updated edition of the bestselling classic Donald Kirkpatrick is a true legend in the training field: he is a past president of ASTD, a member of Training magazine's "HRD Hall of Fame," and the recipient of the 2003 "Lifetime Achievement Award in Workplace Learning and Performance" from ASTD. In 1959 Donald Kirkpatrick developed a four-level model for evaluating training programs. Since then, the "Kirkpatrick Model" has become the most widely used approach to training evaluation in the corporate,

government, and academic worlds. Evaluating Training Programs provided the first comprehensive guide to Kirkpatrick's Four Level Model, along with detailed case studies of how the model is being used successfully in a wide range of programs and institutions. This new edition includes revisions and updates of the existing material plus new case studies that show the four-level model in action. Going beyond just using simple reaction questionnaires to rate training programs, Kirkpatrick's model focuses on four areas for a more comprehensive approach to evaluation: Evaluating Reaction, Evaluating Learning, Evaluating Behavior, and Evaluating Results. Evaluating Training Programs is a how-to book, designed for practitioners in the training field who plan, implement, and evaluate training programs. The author supplements principles and guidelines with numerous sample survey forms for each step of the process. For those who have planned and conducted many programs, as well as those who are new to the training and development field, this book is a handy reference guide that provides a practical and proven model for increasing training effectiveness through evaluation. In the third edition of this classic bestseller, Kirkpatrick offers new forms and procedures for evaluating at all levels and several additional chapters about using balanced scorecards and "Managing Change Effectively." He also includes twelve new case studies from organizations that have been evaluated using one or more of the four levels--Caterpillar, Defense Acquisition University, Microsoft, IBM, Toyota, Nextel, The Regence Group, Denison University, and Pollack Learning Alliance.

Leaders want to see changes in behavior as a result of what people have learned and may expect these new behaviors to deliver results for the business. With the third edition of this book, readers have an opportunity to update their understanding of this classic evaluation framework and to learn from the case studies about how to effectively apply the framework to a variety of learning programs. Readers are presented with the tools and the know-how to tell their own story of value creation.---Foreword by Merrill C. Anderson, Ph.D, Chief Executive Officer, MetrixGlobal, LLC

Will help develop an Army experienced enough to be comfortable with operating anywhere, in any type of operation, under any conditions. Its principles and concepts are intended to produce agile leaders, who can rapidly and easily adapt to changing, ambiguous situations. The manual's 4 chapters address the breadth and depth of Army training concepts. FM 7-0 sets out to change the Army mindset. The Army cannot return to its pre-9-11 focus of training for offensive and defensive operations in major combat operations. Army leaders must think differently about training and leader development in an Army that must be capable of conducting simultaneous offense, defense, and stability or civil support operations
