More than 200 years after it was first published, Mary Shelley's Frankenstein has stood the test of time as a gothic masterpiece--a classic work of horror that blurs the line between man and monster. "If I cannot inspire love, I will cause fear." For centuries, the story of Victor Frankenstein and the monster he created has held readers spellbound. On the surface, it is a novel of tense and steadily mounting dread. On a more profound level, it illuminates the triumph and tragedy of the human condition in its portrayal of a scientist who oversteps the bounds of conscience, and of a creature tortured by the solitude of a world in which he does not belong. A novel of almost hallucinatory intensity, Mary Shelley's Frankenstein represents one of the most striking flowerings of the Romantic imagination.

Winner of the John Dos Passos Prize for Literature "Stunning."--Newsweek With the same audacity with which John Steinbeck wrote about migrant worker conditions in The Grapes of Wrath and T.C. Boyle in The Tortilla Curtain, Viramontes presents a moving and powerful vision of the lives of the men, women, and children who endure a second-class existence and labor under dangerous conditions in California's fields. At the center of this powerful tale is Estrella, a girl about to cross the perilous border to womanhood. What she knows of life comes from her mother, who has survived abandonment by her husband in a land that treats her as if she were invisible, even though she and her children pick the crops of the farms that feed its people. But within Estrella, seeds of growth and change are stirring. And in the arms of Alejo, they burst into a full, fierce flower as she tastes the joy and pain of first love. Pushed to the margins of society, she learns to fight back and is able to help the young farmworker she loves when his ambitions and very life are threatened in a harvest of death. Infused with the beauty of the California landscape and shifting splendors of the passing seasons juxtaposed with the bleakness of poverty, this vividly imagined novel is worthy of the people it celebrates and whose story it tells so magnificently. The simple lyrical beauty of Viramontes' prose, her haunting use of image and metaphor, and the urgency of her themes all announce Under the Feat of Jesus as a landmark work of American fiction.

"Read, read, read. Read everything--trash, classics, good and bad, and see how they do it. Just like a carpenter who works as an apprentice and studies the master. Read! You'll absorb it. Then write. If it is good, you'll find out. If it's not, throw it out the window." --William Faulkner Light in August, a novel about hopeful perseverance in the face of mortality, features some of Faulkner's most memorable characters: quileless, dauntless Lena Grove, in search of the father of her unborn child; Reverend Gail Hightower, who is plagued by visions of Confederate horsemen; and Joe Christmas, a desperate, enigmatic drifter consumed by his mixed ancestry.

Winner of 2014 AAAS/Subaru SB&F Prize for Best Young Adult Science Book Longlisted for the PEN/E.O. Wilson Literary Science Writing Award One of Nature's Summer Book Picks One of Publishers Weekly's Top Ten Spring 2013 Science Books For centuries, we've toyed with our creature companions, breeding dogs that herd and hunt, housecats that look like tigers, and teacup pigs that fit snugly in our handbags. But what happens when we take animal alteration a step further, engineering a cat that glows green under ultraviolet light or cloning the beloved family Labrador? Science has given us a whole new toolbox for tinkering with life. How are we using it? In Frankenstein's Cat, the journalist Emily Anthes takes us from petri dish to pet store as she explores how biotechnology is shaping the future of our furry and feathered friends. As she ventures from bucolic barnyards to a "frozen zoo" where scientists are storing DNA from the planet's most exotic creatures, she discovers how we can use cloning to protect endangered species, craft prosthetics to save injured animals, and employ genetic engineering to supply farms with disease-resistant livestock. Along the way, we meet some of the animals that are ushering in this astonishing age of enhancement, including sensor-wearing seals, cyborg beetles, a bionic bulldog, and the world's first cloned cat. Through her encounters with scientists, conservationists, ethicists, and entrepreneurs, Anthes reveals that while some of our interventions may be trivial (behold: the GloFish), others could improve the lives of many species--including our own. So what does biotechnology really mean for the world's wild things? And what do our brave new beasts tell us about ourselves? With keen insight and her trademark spunk, Anthes highlights both the peril and the promise of our scientific superpowers, taking us on an adventure into a world where our grandest science fiction fantasies are fast becoming reality.

After he constructs a corpse from body parts found on the street, Hadi wants the government to prepare a proper burial, but when the corpse goes missing, a series of strange murders occur and Hadi realizes he has created a monster.
