2Guide to Explosive Atmospheres and Hazardous Locations Intertek. We certify products for compliance with IECEx, the European Union 's ATEX Directive, the National Electrical Code (NEC) in the U.S. and the Canadian Electrical Code (CEC) in Canada. Some of the standards we test to include those of CENELEC, CEN, IEC, ANSI, UL, CSA, MIL Specs and FM. We offer the Ex Mark and the CE Mark to show compliance with EU requirements for Explosive Atmosphere regulations.

Guide to Explosive Atmospheres & Hazardous Locations

An explosive atmosphere means a mixture with air, under atmospheric conditions, of flammable substances in the form of gases, vapours, mists or dusts in which, after ignition has occurred, combustion spreads to the entire unburned mixture. An explosive atmosphere does not always result in an explosion, but if it caught fire, the

Guide to Explosive Atmospheres - shop.eriks.co.uk

Introduction. ATEX fans are fans designed for use in potentially explosive atmospheres and are governed by EU Directive 2014/34/EU. This Directive is intended to increase safety by using a logical risk identification and mitigation method for design manufacture and use. With so many fans in operation in potentially hazardous areas, and the real and perceived risk of such fans causing a possible ignition, in addition to the general mechanical standards (ISO/IEC 80079-36 & 80079-37), a ...

The ATEX Fan Guide | EN14986 Explosive Atmospheres ...

If an explosive atmosphere occurs, it must be possible to switch off the equipment. The constructional explosion-protection measures ensure the required degree of safety during normal operation, even under severe operating conditions and, in particular, in cases of rough handling and changing environmental influences.

Global Reference Guide on the Marking of Electrical ...

The manuscript of the guide was completed in April 2003. The guide to good practice should be used in conjunction with Directive 1999/92/EC (on minimum requirements for improving the safety and health protection of workers potentially at risk from explosive atmospheres), the Framework Directive 89/391/EEC and Directive 94/9/EC.

Non-binding guide to good practice for implementing ...

Explosive Atmospheres and Hazardous Areas A hazardous area is defined as an area in which explosive atmospheres, or may be expected to be, present in quantities such as to require special precaution for the construction and use of electrical equipment.
