Harrison L5a Lathe
Apart from the earliest L.5 models, on Harrison lathes of all types prior to the M Series the changewheels were guarded by well made, hinge-open, cast-aluminium cover - whereas the equivalent Colchester models had covers that, whilst also in cast aluminium, had to be pulled off their long mounting studs and (before they could be replaced) the loose, knurled-edge round retaining nuts hunted down to where they had rolled when the operator dropped them.

Harrison Industrial Metalworking Lathes for sale | eBay
One of the problems in identifying specific models of Harrison lathe made during the period 1938 to 1965 is the lack of a nameplate; some lathes, especially the later 11-inch, 140, 155, 165, 190, 13-inch and 15-inch types, did have them, but by no means all.

Harrison Lathes
HARRISON THE LATHE: T S Harrison & Sons was founded in 1898 and in the year 1900 built their first Harrison Lathe in Yorkshire, England. Harrison enjoys a long lathe history that spans over 110 years. To date there exists a North American Machine population of nearly 20,000 lathes and 140,000 machines throughout the world.

HARRISON L5A 11" LATHE FOR SALE Screwcutting Machine Tool ...
Harrison offered a conversion kit for most of their lathes but preferred customers to buy the unit ready installed on lathes of 11-inch swing and above. The device did not interfere with ordinary turning - and a lathe so equipped was every bit as versatile as one without the accessory.

Harrison lathe - YouTube
Lathe Edward Shaw; aged 30 4th January, 1905 : top of middle finger of left hand cut off 10th January, 1905 : injury to hand Carelessness. Through ignor- ing instructions and handling drill wrongly he got his hand jambed in the lathe-rest. Mishap. Finger caught be- tween tool and the piece of brass he was working. With care it might have been avoided. Foolhardiness. Attempted to lubricate ...

AtoJs Online — Appendix to the Journals of the House of ...
While working the lathe, Ait- ken neglected to remove the hand-rest, and his ringer was caught between it and the work in the lathe. Toop's left hand came in con- tact with the saw through the timber slipping. When attempting to plane a short piece of wood the fingers of Hendriksen's left hand came in contact with the knives of the machine. In cleaning the brass borings off Lathe Moore ...
