Maths Revision Quizzes - Studying Economics

Logical Deduction in Economics Economics, like many aspects of geometry, is not readily verifiable or falsifiable by use of empirical quantitative analysis. Rather, it flows from logical proofs.

What math skills do I need to study microeconomics?

The types of math used in economics are primarily algebra, calculus and statistics. Algebra is used to make computations such as total cost and total revenue. Calculus is used to find the derivatives of utility curves, profit maximization curves and growth models. Statistics allows economists to make forecasts and determine the probability of an occurrence.
