Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing ...and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.

Chronicle covers the years 852-1116 of Russian history.

From New York Times and USA Today bestselling author Larissa Ione comes a new story in her Demonica Underworld series... Even in the fathomless depths of the underworld and the bleak chambers of a damaged heart, the bonds of love can heal...or destroy. He holds the ability to annihilate souls in the palm of his hand. He commands the respect of the most dangerous of demons and the most powerful of angels. He can seduce and dominate any female he wants with a mere look. But for all Azagoth's power, he's bound by shackles of his own making, and only an angel with a secret holds the key to his release. She's an angel with the extraordinary ability to travel through time and space. An angel with a tormented past she can't escape. And when Lilliana is sent to Azagoth's underworld realm, she finds that her past isn't all she can't escape. For the irresistibly sexy fallen angel known as Azagoth is also known as the Grim Reaper, and when he claims a soul, it's forever... \*\*Every 1001 Dark Nights novella is a standalone story. This volume is an account of early developments in meteorological research that brings to life the struggles of young pioneers—the trials and tribulations of developing new instruments, and the difficulty of sampling the atmosphere under challenging working conditions, to name just two. The book adds to the rich heritage of meteorological literature, documenting all the "firsts" achieved by this important weather observatory. An extensive bibliography of work by Observatroy personnel and source references to the Observatory's climatological data are provided. Heavily illustrated and richly detailed, this book will be of value to weather enthusiasts interested in the development of the science of meteorology, as well as to practicing meteorologists and weather historians wanting to study the growth of their scientific discipline.

From the #1 New York Times bestselling author of The Da Vinci Code, Angels & Demons, and Inferno and the "master of smart thrills" (People) comes a "rocket-fast thriller" (Vince Flynn) about an astonishing NASA discovery that unravels a deadly conspiracy that leads all the way to the White House. When a NASA satellite spots evidence of an astoundingly rare object buried deep in the Arctic ice, the floundering space agency proclaims a much-needed victory—one that could have profound implications for US space policy and the impending presidential election. With his re-election hanging in the balance, the President sends White House Intelligence analyst Rachel Sexton to the Milne Ice Shelf to verify the authenticity of the find. Accompanied by a team of experts, including the charismatic academic Michael Tolland, Rachel uncovers the unthinkable: evidence of scientific trickery. Before she can contact the President, she and Michael are attacked by a deadly team of assassins controlled by a mysterious power broker who will stop at nothing to hide the truth. Fleeing for their lives in an environment as desolate as it is lethal, their only hope for survival is to find out who is behind this masterful ploy. The truth, they will learn, is the most shocking deception of all in this "taut, fast-paced, barn-burner of a book" (St. Petersburg Times).
