Sociolinguistics is the descriptive study of the effect of any and all aspects of society, including cultural norms, expectations, and context, on the way language is used, and society's effect on language. It differs from sociology of language, which focuses on the effect of language on society.Sociolinguistics overlaps considerably with pragmatics. ...

The basic premise of sociolinguistics is that language is variable and ever-changing. As a result, language is not uniform or constant. Rather, it is varied and inconsistent for both the individual user and within and among groups of speakers who use the same language. People adjust the way they talk to their social situation.

The work of the linguist Charles A. Ferguson spans more than three decades, and is remarkable for having been consistently at the forefront of scholarship on the relationship between language and society. This volume collects his most influential and seminal papers, each having expanded the parameters of sociolinguistics and the sociology of language.

Bilingual education is seen as the result of societal factors rather than the cause of certain behaviours in children. Bilingualism of an ethnic group within a nation state is seen to reinforce the boundaries between that group and the larger society, often undertaken to enable a group to resist assimilation. The book covers a number of topics.
