Research Paper on Water Conservation ...

Water Conservation. Water conservation encompasses the policies, strategies and activities to manage fresh water as a sustainable resource, to protect the water environment, and to meet current and future human demand. Population, household size and growth and affluence all affect how much water is used. Conserving water can also extend the life of your septic system by reducing soil saturation, and reducing any pollution due to leaks.

Water Conservation | List of High Impact Articles | PPTs ...

Water Conservation is the process of saving water everywhere in the world. Do you know why we need to save water? Well we need to save water because it would help out animals and people in need of food or water. If a human, plant, or animal likes in the desert then they wont have any water and they will probably die from thirst and hunger.
