This report is the Committee's annual review of how the FCO is managing its resources, examining the departmental annual report for 2007-08 (Cm. 7398, ISBN 9780101739825). Chapters cover: new strategic framework; performance measurement; global network; essential services; FCO Services; personnel issues; transparency and openness; financial management; public diplomacy and communication; the British Council; the BBC World Service. The Committee is concerned that the FCO is facing serious financial pressures in this financial year due to the Treasury's withdrawal of its support for the Overseas Pricing Mechanism (OPM) which used to protect departments from the weakening of sterling. There is a risk that the FCO may not be able to meet higher international subscriptions over the next two financial years, causing its performance against Public Service Agreement targets to suffer. The likely increase in the UN Regular Budget and other international subscriptions will push this figure even higher. The FCO should have to shoulder the financial burden from within its already tight budget to pay for subscriptions which also benefit other Government departments. The Committee recommends that additional nondiscretionary costs should properly be met by the Treasury.

Designed to promote reflection, discussion, and action among the entire learning community, Educating Everybody's Children encapsulates what research has revealed about successfully addressing the needs of students from economically, ethnically, culturally, and linguistically diverse groups and identifies a wide range of effective principles and instructional strategies. Although good teaching works well with all students, educators must develop an extensive repertoire of instructional tools to meet the varying needs of students from diverse backgrounds. Those tools and the knowledge base behind them are the

foundation of this expanded and revised second edition of *Educating Everybody's Children*. Each strategy discussed in the book includes classroom examples and a list of the research studies that support it. The most important thing we have learned as a result of the education reform movement is that student achievement stands or falls on the motivation and skills of teachers. We must ensure that all teachers are capable of delivering a standards-based curriculum that describes what students should know and be able to do, and that these standards are delivered by means of a rich and engaging "pedagogy of plenty." By these two acts we can ensure that all schools will be ready and able to educate everybody's children.
